Business and Pipeline Update

Rob Davis

Chairman and Chief Executive Officer

Forward-looking statement of Merck & Co., Inc., Rahway, N.J., USA

This presentation of Merck & Co., Inc., Rahway, N.J., USA (the “company”) includes “forward-looking statements” within the meaning of the safe harbor provisions of the U.S. Private Securities Litigation Reform Act of 1995. These statements are based upon the current beliefs and expectations of the company’s management and are subject to significant risks and uncertainties. There can be no guarantees with respect to pipeline candidates that the candidates will receive the necessary regulatory approvals or that they will prove to be commercially successful. If underlying assumptions prove inaccurate or risks or uncertainties materialize, actual results may differ materially from those set forth in the forward-looking statements.

Risks and uncertainties include but are not limited to, general industry conditions and competition; general economic factors, including interest rate and currency exchange rate fluctuations; the impact of pharmaceutical industry regulation and health care legislation in the United States and internationally; global trends toward health care cost containment; technological advances, new products and patents attained by competitors; challenges inherent in new product development, including obtaining regulatory approval; the company’s ability to accurately predict future market conditions; manufacturing difficulties or delays; financial instability of international economies and sovereign risk; dependence on the effectiveness of the company’s patents and other protections for innovative products; and the exposure to litigation, including patent litigation, and/or regulatory actions.

The company undertakes no obligation to publicly update any forward-looking statement, whether as a result of new information, future events or otherwise. Additional factors that could cause results to differ materially from those described in the forward-looking statements can be found in the company’s Annual Report on Form 10-K for the year ended December 31, 2023 and the company’s other filings with the Securities and Exchange Commission (SEC) available at the SEC’s Internet site (www.sec.gov).

Delivering on our key strategic priorities

Advancing the pipeline to meet patient unmet need

Executing on strategic business development to augment pipeline

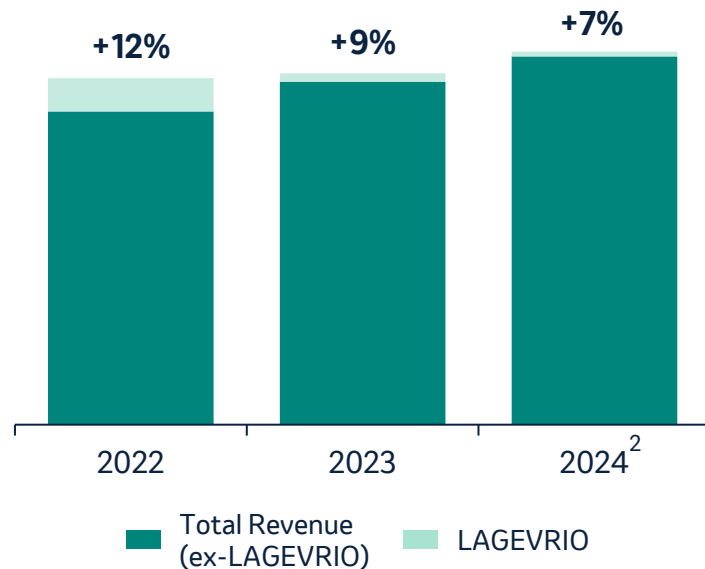

Achieving strong commercial and financial performance

Creating long-term value for patients and shareholders

Sustaining strong track record of execution since 2021

Strong underlying revenue growth¹

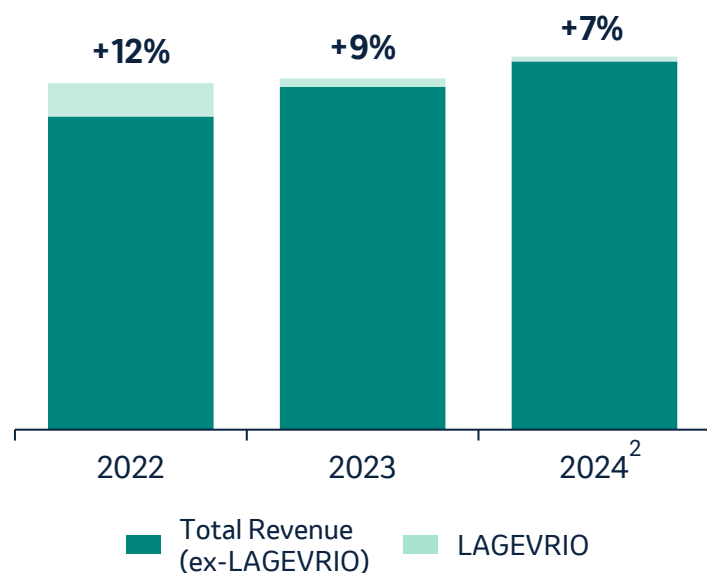

1. Growth rates represent annualized nominal growth, excluding LAGEVRIO sales

2. 2024 not actuals; 2024 value reflects the midpoint of guidance (\$63.9B) issued on October 31, 2024.

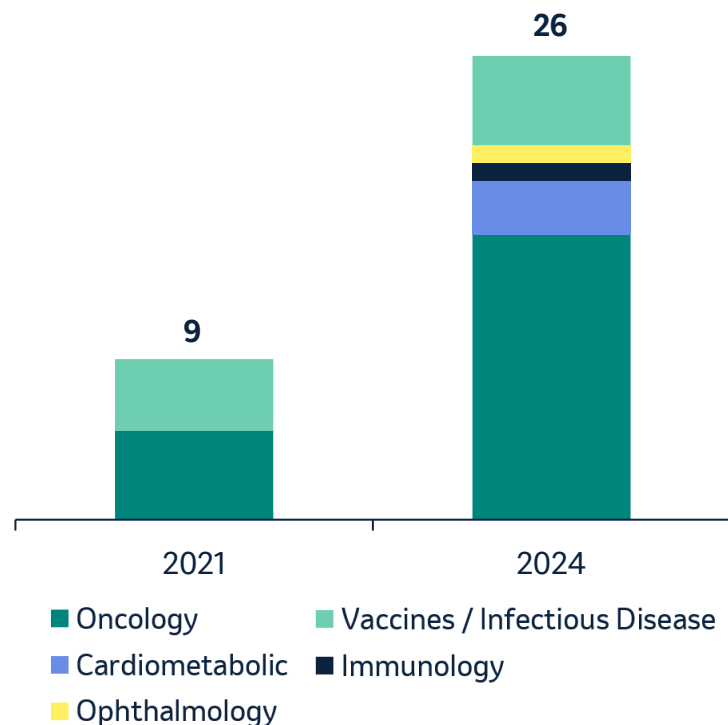

LAGEVRIO sales in 2022 = \$5.68B, 2023 = \$1.43B and Sept 2024 YTD = \$0.84B

Sustaining strong track record of execution since 2021

Strong underlying revenue growth¹

Nearly tripled number of assets in Phase 3 development³

1. Growth rates represent annualized nominal growth, excluding LAGEVRIO sales

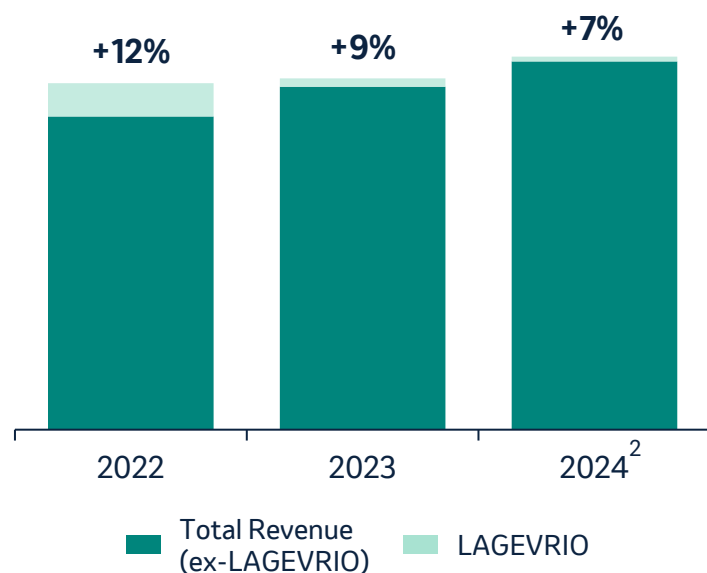

2. 2024 not actuals; 2024 value reflects the midpoint of guidance (\$63.9B) issued on October 31, 2024.

LAGEVRIO sales in 2022 = \$5.68B, 2023 = \$1.43B and Sept 2024 YTD = \$0.84B

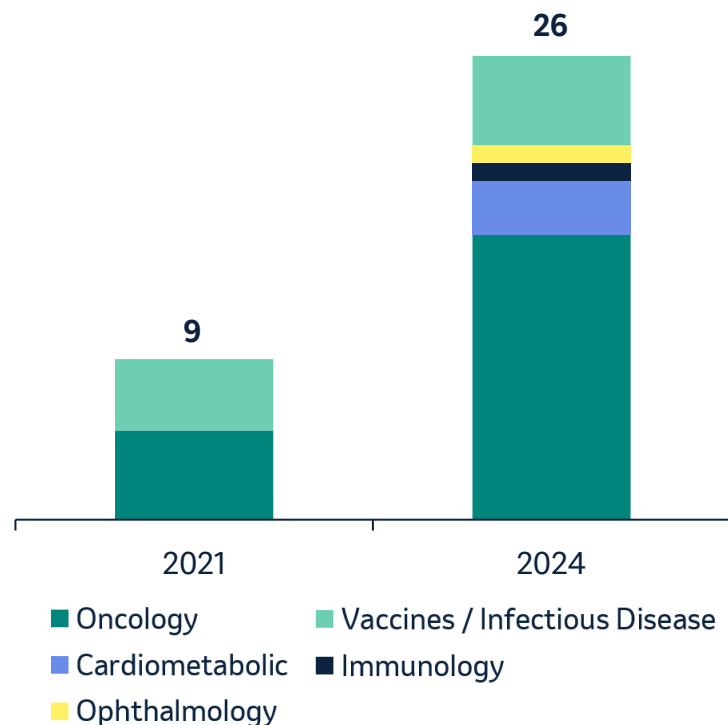

3. Assets in Phase 3 development include currently marketed products with ongoing studies in additional indications

Sustaining strong track record of execution since 2021

Strong underlying revenue growth¹

Nearly tripled number of assets in Phase 3 development³

~\$40B invested in strategic business development⁴

1. Growth rates represent annualized nominal growth, excluding LAGEVRIO sales

2. 2024 not actuals; 2024 value reflects the midpoint of guidance (\$63.9B) issued on October 31, 2024.

LAGEVRIO sales in 2022 = \$5.68B, 2023 = \$1.43B and Sept 2024 YTD = \$0.84B

3. Assets in Phase 3 development include currently marketed products with ongoing studies in additional indications

4. BD figure includes upfront and milestone payments related to acquisitions, strategic collaborations and licensing agreements.

Achieved notable regulatory and commercial milestones in 2024

Significant Approvals

Cardiometabolic

- WINREVAIR in PAH (STELLAR)

Vaccines

- CAPVAXIVE for pneumococcal disease in adults

Oncology

- Several KEYTRUDA approvals in advanced cancers
 - Cervical cancer
 - Endometrial carcinoma
 - Malignant pleural mesothelioma

Animal Health

- BRAVECTO Injectable in EU

Key Positive Data Readouts

Cardiometabolic

- WINREVAIR (ZENITH)

Infectious Disease

- Clesrovimab for RSV
 - Infants entering first season
- Islatravir based regimens¹
 - Treatment of HIV in adults

Oncology

- SC pembrolizumab with berahyaluronidase alfa
- KEYTRUDA in certain patients with earlier stage cancers:
 - HNSCC, MIUC
 - OS results from RCC, TNBC, cervical cancer² studies

Immunology

- Tulisokibart in UC and CD

Successful Ongoing Launches

1. Includes islatravir in combination with doravirine and in combination with lenacapavir

2. Cervical cancer indication is for FIGO 2014 Stage III-IVA only and not in earlier stage cancer (the OS data for the full ITT population does include earlier stages)

Building on momentum in 2025 to advance standard of care for patients

Significant Potential Approvals & Launches

Vaccines

- GARDASIL male indication in China for ages 9 to 26¹

Infectious Disease

- Clesrovimab (PDUFA June 10th)

Oncology

- SC pembrolizumab with berahyaluronidase alfa
- Patritumab deruxtecan (HER3-DXd ADC)²

Animal Health

- BRAVECTO Injectable (U.S.)
- Dermatology product in Companion Animal

Key Data Readouts

Cardiometabolic

- Enlicitide decanoate (Oral PCSK9i)
- WINREVAIR in PH due to LHD (Phase 2 CADENCE)
- Efinopegdutide (GLP-1 / glucagon receptor co-agonist)

Infectious Disease

- Islatravir based regimens (NRTTI for HIV treatment)
- MK-8527 (NRTTI for HIV PrEP)

Oncology

- KEYTRUDA + chemotherapy in earlier stage HNSCC

1. Approval received in January 2025 for GARDASIL 4

2. FDA issued CRL in June 2024

Evolving to a more diversified commercial portfolio with robust Phase 3 development program

2024-2025		2026-2027		2028+
 CAPVAXIVE™ Pneumococcal 21-valent Conjugate Vaccine	patritumab deruxtecan¹ <i>HER3 ADC</i>	bomedemstat <i>LSD1i</i>	MK-3000 <i>Tetravalent tri-specific antibody</i>	MK-1084⁴ <i>KRAS G12C<i>i</i></i>
 WINREVAIR™ (sotatercept-csrk)	clesrovimab <i>RSV mAb</i>	ifinatumab deruxtecan¹ <i>B7H3 ADC</i>	nemtabrutinib <i>BTKi</i>	opevesostat⁵ <i>CYP11A1i</i>
pembrolizumab + berahyaluronidase alfa <i>SC administration</i>	zilovertamab vedotin <i>ROR1 ADC</i>	pembrolizumab + quavonlimab <i>CTLA-4</i>	raludotatug deruxtecan¹ <i>CDH6 ADC</i>	V940⁶ <i>INT</i>
enlicitide decanoate <i>Oral PCSK9i</i>	islatravir + doravirine <i>NRTTI</i>	tulisokibart <i>TL1A</i>	sacituzumab tirumotecan³ <i>TROP2 ADC</i>	
		islatravir + lenacapavir² <i>NRTTI</i>		

20 new growth drivers, almost all of which have blockbuster potential

Note: Timing reflects primary completion date on clinicaltrials.gov. Excludes ongoing Phase 3 studies for marketed products including KEYTRUDA, Lenvima, Lynparza, Verquvo, LAGEVRIO and WELIREG.

1. Collaboration with Daiichi Sankyo 2. Collaboration with Gilead 3. Collaboration with Kelun Biotech 4. Collaboration with Taiho and Astex
5. Collaboration with Orion 6. Collaboration with Moderna

Oncology
Cardiometabolic

Infectious Disease / Vaccines
Ophthalmology / Immunology

Executing commercially while advancing our diverse pipeline

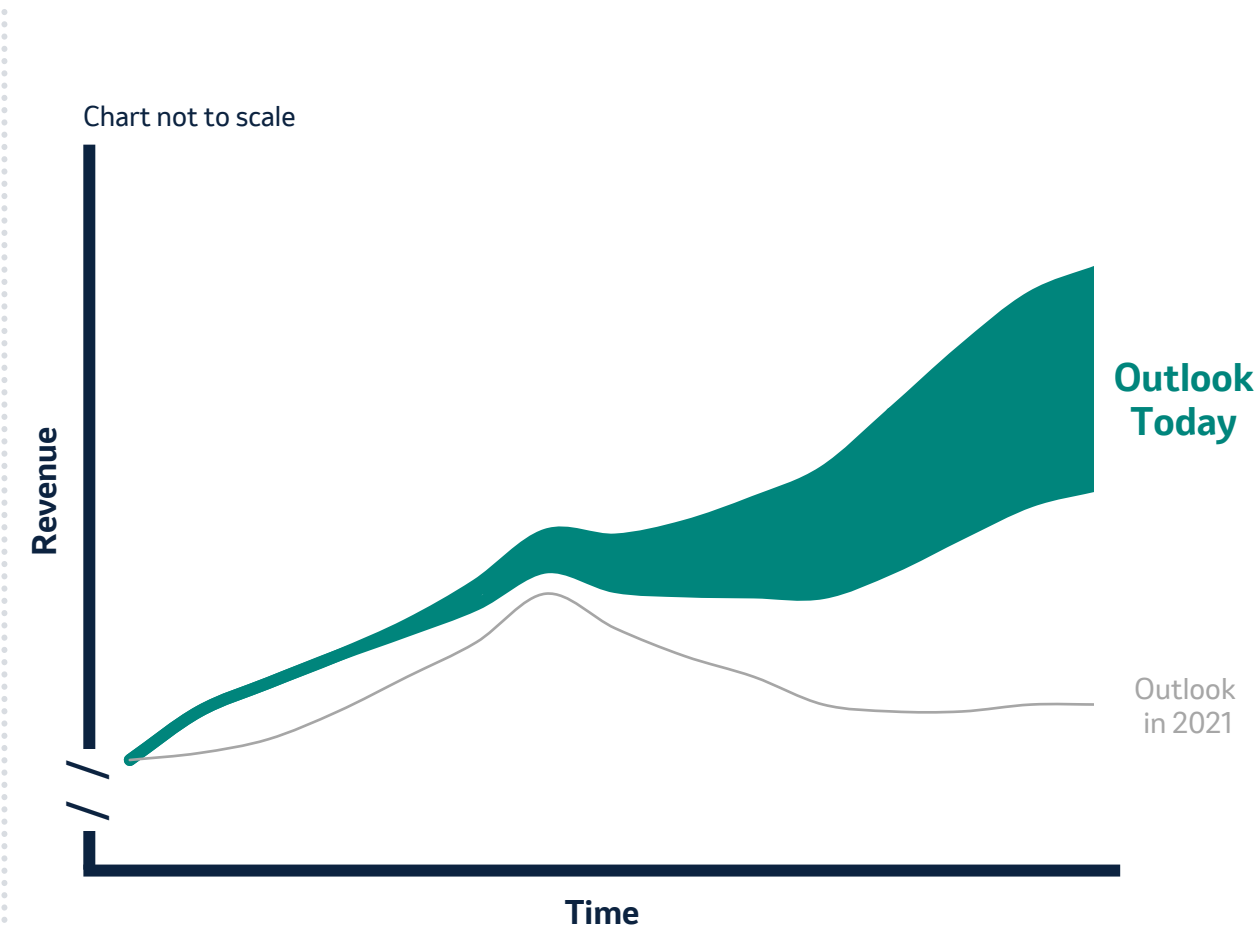

Significant progress from 2021 to 2024

1. 2024 not actuals; 2024 value reflects the midpoint of guidance issued on October 31, 2024

Making significant progress in navigating KEYTRUDA LOE period

Significant progress from 2021 to 2024

1. 2024 not actuals; 2024 value reflects the midpoint of guidance issued on October 31, 2024

Expanding robust pipeline to drive patient impact and value creation into the mid-2030s

	Prior Opportunity ¹
Oncology	>\$20B
Cardiometabolic	~\$15B
Immunology	Multibillion

1. All dollar figures above are non-risk adjusted annual sales by the mid 2030s
Refer to Appendix for detail of revenue opportunity by therapeutic area

Expanding robust pipeline to drive patient impact and value creation into the mid-2030s

	Prior Opportunity ¹	Updated Opportunity ¹
Oncology	>\$20B	>\$25B
Cardiometabolic	~\$15B	~\$15B
Immunology	Multibillion	>\$5B
HIV	Not provided	>\$5B
Ophthalmology	Not provided	Multibillion

1. All dollar figures above are non-risk adjusted annual sales by the mid 2030s
Refer to Appendix for detail of revenue opportunity by therapeutic area

Additional opportunities across portfolio, earlier phase pipeline and business development

Updated Opportunity¹

Oncology	>\$25B
Cardiometabolic	~\$15B
Immunology	>\$5B
HIV	>\$5B
Ophthalmology	Multibillion

Infectious Disease / Vaccines

- Including clesrovimab, V181 and others

Animal Health

- Expect revenue to more than double by the mid-2030s

Early-Phase Programs

- Many advancing to Phase 2 in 2025/2026

Business Development

- Significant capacity to further augment pipeline

1. All dollar figures above are non-risk adjusted annual sales by the mid 2030s
Refer to Appendix for detail of revenue opportunity by therapeutic area

Q&A

Appendix

Key data readouts

2025

clesrovimab Monoclonal antibody <i>RSV</i>	MK-6194 IL-2 mutein <i>Vitiligo</i>
efinopegdutide GLP-1/glucagon receptor dual agonist <i>Precirrhotic MASH, MASLD</i>	Lynparza ^{1,3} PARP inhibitor <i>Advanced solid tumors</i>
enlicitide decanoate Oral PCSK9 inhibitor <i>Hypercholesterolemia</i>	patritumab deruxtecan ¹ HER3 ADC <i>Bladder, Cervical, Endometrial, Esophageal, Gastric, HNSCC, Melanoma, Ovarian, Pancreatic, Prostate</i>
islatravir + doravirine NRTTI <i>HIV-1 infection</i>	quavonlimab ² CTLA-4 <i>NSCLC</i>
islatravir + MK-8507 NRTTI <i>HIV-1 infection</i>	WINREVAIR Activin signaling inhibitor <i>PAH, PH due to LHD</i>
Lenvima ^{1,2} Kinase inhibitor <i>Esophageal</i>	zilvertamab vedotin ROR1 ADC <i>Heme (R/R DLBCL)</i>

2026-2027

bomedemstat LSD-1 inhibitor <i>Essential Thrombocythemia</i>	nemtabrutinib BTK inhibitor <i>Heme (CLL, SLL, RTL, MZL, MCL, FL, WM)</i>
boserolimab ² CD27 agonist <i>Neoplasm malignant</i>	nemtabrutinib BTK inhibitor <i>Heme (CLL, SLL)</i>
efinopegdutide GLP-1/glucagon receptor dual agonist <i>Compensated cirrhosis secondary to MASH</i>	raludotatug deruxtecan ¹ CDH6 ADC <i>Ovarian</i>
ifinatamab deruxtecan ¹ B7H3 ADC <i>SCLC</i>	quavonlimab + pembrolizumab CTLA-4 coformulation <i>CRC</i>
islatravir + lenacapavir ¹ NRTTI <i>HIV-1 infection</i>	quavonlimab + pembrolizumab CTLA-4 coformulation <i>RCC</i>
Lenvima ^{1,2} Kinase inhibitor <i>Gastric</i>	sacituzumab tirumotecan ^{1,3} TROP2 ADC <i>Breast, Gastric, NSCLC</i>
Lynparza ^{1,3} PARP inhibitor <i>Advanced solid tumors</i>	tulisokibart TL1A inhibitor <i>Ulcerative colitis</i>
Lynparza ^{1,3} PARP inhibitor <i>NSCLC, SCLC</i>	WELIREG ³ HIF-2α inhibitor <i>Endometrial, Esophageal, HCC, Prostate, Rare Cancers</i>
MK-1167 Undisclosed <i>Alzheimer's disease dementia</i>	WELIREG ^{3,4} HIF-2α inhibitor <i>RCC</i>
MK-3000 Wnt agonist <i>DME</i>	WINREVAIR Activin signaling inhibitor <i>PAH</i>
MK-5475 Inhaled sGC stimulator <i>PH-COPD</i>	zilvertamab vedotin ROR1 ADC <i>Heme (R/R DLBCL)</i>
MK-6194 IL-2 mutein <i>Lupus</i>	zilvertamab vedotin +/- nemtabrutinib ROR1 ADC, BTK inhibitor <i>Heme (MCL, RTL, FL, CLL)</i>

2028+

bomedemstat LSD-1 inhibitor <i>Heme (ET, Primary MF, MF, Post-PV MF, Post-ET MF, PV)</i>	opevesostat ¹ CYP11A1 inhibitor <i>Prostate</i>
enlicitide decanoate Oral PCSK9 inhibitor <i>Hypercholesterolemia</i>	pembrolizumab + berahyaluronidase alfa Subcutaneous administration <i>Hematology</i>
LAGEVRIO Oral antiviral <i>COVID-19</i>	sacituzumab tirumotecan ^{1,3} TROP2 ADC <i>Cervical, Endometrial, NSCLC, TNBC</i>
MK-1084 ² KRAS G12C inhibitor <i>NSCLC</i>	tulisokibart TL1A inhibitor <i>Crohn's Disease</i>
ifinatamab deruxtecan ¹ B7H3 ADC <i>Biliary, Bladder, Breast, Cervical, Colorectal, Endometrial, Esophageal, HNSCC, Ovarian</i>	V940 ^{1,2} INT <i>Melanoma, NSCLC</i>
ifinatamab deruxtecan ¹ B7H3 ADC <i>eSCC</i>	V940 ² INT <i>cSCC, RCC</i>
nemtabrutinib BTK inhibitor <i>Heme (CLL, SLL, R/R CLL, R/R SLL)</i>	WINREVAIR Activin signaling inhibitor <i>PAH</i>
	zilvertamab vedotin ROR1 ADC <i>Heme (DLBCL)</i>

Cardiometabolic	Immunology	Infectious Disease / Vaccines
Neuroscience	Oncology	Ophthalmology

Asset
MOA
Indication
Phase 3

Note: Timing reflects primary completion date on clinicaltrials.gov

Assets in Phase 2, 2/3, or 3 development

Excludes certain ongoing studies for KEYTRUDA

1. Being developed in a collaboration 2. Being developed in combination with KEYTRUDA

3. Being developed as monotherapy and/or in combination with KEYTRUDA

4. Being developed as monotherapy and/or in combination with Lenvima

Expanding robust pipeline to drive patient impact, long-term growth and value creation into the mid-2030s

	Prior Opportunity ¹	Updated Opportunity ¹
Oncology	>\$20B Includes TROP-2 ² , ROR1, CYP11A1i ³ , LSD-1i, KRASi, BTKi, HER3, B7H3, CDH6 ADCs ⁴ and V940 ⁵	>\$25B Now includes MK-6070 and reflects increased confidence in other programs
Cardiometabolic	~\$15B Includes WINREVAIR, MK-0616, MK-2060, MK-5475, Verquvo ⁶ and MK-6024	~\$15B
Immunology	Multibillion In each indication (CD and UC) for tulisokibart	>\$5B
HIV	Not provided	>\$5B Includes islatravir based regimens, MK-8527
Ophthalmology	Not provided	Multibillion MK-3000

1. All dollar figures above are non-risk adjusted annual sales by the mid 2030s

2. Collaboration with Kelun Biotech 3. Collaboration with Orion 4. Collaboration with Daiichi Sankyo 5. Collaboration with Moderna 6. Collaboration with Bayer, includes expanded indication to chronic heart failure without a worsening event for VERQUVO

Acronyms

ADC – Antibody-drug conjugate

B7H3 – B7 homolog 3

BTK – Bruton tyrosine kinase

CD – Crohn's Disease

CDH6 – Cadherin-6

CD27 – Cluster of differentiation 27

CLL – Chronic lymphocytic leukemia

CRC – Colorectal cancer

cSCC – Cutaneous squamous cell carcinoma

CTLA-4 – Cytotoxic T-lymphocyte associated protein 4

CYP11A1 – Cytochrome P450 Family 11 Subfamily A Member 1

DLBCL – Diffuse large B-cell lymphoma

DME – Diabetic macular edema

ET – Essential thrombocythemia

eSCC – Esophageal squamous cell carcinoma

FL – Follicular lymphoma

GLP-1 – Glucagon-Like Peptide-1

HCC – Hepatocellular carcinoma

HER3 – Human epidermal growth factor receptor 3

HFrEF – Heart failure with reduced ejection fraction

HIF2 α – Hypoxia-inducible factor-2 α

HNSCC – Head and neck squamous cell carcinoma

IL-2 – Interleukin-2

INT – Individualized neoantigen therapy

KRAS – Kirsten rat sarcoma viral oncogene homolog

LHD – Left heart disease

LSD1 – Lysine specific demethylase 1

mAb – Monoclonal antibody

MASH – Metabolic dysfunction-associated steatohepatitis

MASLD – Metabolic-associated steatotic liver disease

MCL – Mantle cell lymphoma

MF – Myelofibrosis

MIUC – Muscle invasive urothelial cancer

MZL – Marginal zone lymphoma

NRTTI – Nucleoside reverse transcriptase translocator inhibitor

NSCLC – Non-small cell lung cancer

OS – Overall Survival

PAH – Pulmonary arterial hypertension

PH – Pulmonary hypertension

PH-COPD – Pulmonary hypertension in chronic obstructive pulmonary disease

PARP – Poly-ADP ribose polymerase

PCSK9 – Proprotein Convertase Subtilisin/Kexin Type 9

PCV – Pneumococcal conjugate vaccine

PDUFA – Prescription drug user fee act

PrEP – Pre-exposure prophylaxis

PV – Polycythemia vera

R/R – Relapsed or refractory

RCC – Renal cell carcinoma

ROR1 – Receptor tyrosine kinase-like orphan receptor 1

RSV – Respiratory syncytial virus

RTL – Richter's transformation lymphoma

SC – Subcutaneous

SCLC – Small cell lung cancer

sGC – Soluble guanylate cyclase

SLL – Small lymphocytic lymphoma

TL1A – Tumor necrosis factor-like cytokine 1A

TNBC – Triple negative breast cancer

TROP2 – Trophoblast cell surface antigen-2

UC – Ulcerative colitis

WM – Waldenström's macroglobulinemia
